650000	PS90	40,000 - 50,000	9'-9"	9'-6"	10"	107"
650200	PS100	50,000 - 60,000	10'-9"	10'-6"	10"	120"

Pre Separator Construction

The Pre Separator frame is constructed from 2 1/2" heavy duty square steel tubing. The screen is fabricated from rolled angle iron with 2" x 1/4" flat bar spokes. The filter screen is woven polyester material with a draw band sewn around the circumference.

- Nozzles: fabricated from steel.
- Gear drive: Heavy duty gear box driven by 1 HP gear motor
- Seal: One part polyester heavy duty felt
- Drive Shaft: Heavy duty 1 15/16" solid steel with pillow block bearings at each end
- Filter Screens: Selected for specific application. Contact sales for recommendations.
